

# 7 Cyber Threats to Watch This December

December brings holiday cheer but also increased cyber risks like AI-driven phishing and fake delivery scams. Here are the top 7 threats of the season with practical tips to protect your data and finances.

## Protect Yourself This Holiday Season: 7 Cyber Threats to Watch

1

**Delivery Scams:** Don't click on fake shipping alerts. Check orders directly in apps.

2

**Gift Card Fraud:** Inspect physical gift cards or go digital. Verify unusual gift card requests.

3

**AI Scams:** Be cautious of urgent, well-written emails or calls mimicking loved ones or CEOs.

4

**Fake Social Ads:** Research websites before buying. Use credit cards for safer transactions.

5

**Charity Imposters:** Donate directly through verified charity websites, not email links.

6

**Juice Jacking:** Avoid public USB charging ports. Use your own adapter or a data blocker.

7

**Password Attacks:** Never reuse passwords. Enable MFA to protect all accounts.

**Stay vigilant and have a safe holiday season!**
